DEVELOPMENT EXPERIENCE

Senior Front-End Engineer - Gracenote/Nielsen

May '21 - Sept 23'

Member of the Audience Measurement team that built software solutions that leverage Gracenote's global entertainment database.

- Developed React.JS based Business Intelligence applications to display and summarize large data sets
- Delivered extremely configurable user interfaces with reusable HTML/JS components and CSS3
- Primary Tools: ReactJS, Redux, JavaScript, HTML5, CSS3

Software Engineer, Vungle

June '18 - June '20

Key member of the Applications team that manages both the primary internal and external facing dashboards and products of the company.

- Contributed software engineering expertise in the development of products through the software lifecycle, from requirements definition through successful deployment.
- Overhauled navigation and filtering functionality throughout managed applications that increased internal users workflow efficiency by 20%.
- Led engineering initiative to migrate all legacy dashboard functionality to contemporary dashboards, thereby significantly decreasing tech debt and overhead for the applications team.
- Primary Tools: ReactJS, Redux, Node.js, JavaScript, HTML5, CSS3

Front-End Engineer, Idean

May'15 - Mar' 18

Collaborated with UI/UX and Visual designers to build out SPA's and projects to spec based on wireframe mockups and visual designs.

- Projects ranged from enterprise level SaaS applications for Fortune 500 companies to prototypes for recent startups.
- Primary Tools: ReactJS, Redux, JavaScript, HTML5, CSS3
